Color	Core Disturbance	Description
5Y 4/1	mod	Disrupted core surface in upper 40cm grey clay-silty. Fine grained, well sorted.
		40cm - 60cm mm scale laminations of fine sandy-silt laminations start at mm-scale spacings but show an increase in spacing @ 50cm and continues onwards.
		@ ≈ 90cm shift towards cm-scale spacings between f. grained sandy beds of mm scale thickness.
