SSE
Line 386_Underway_049
NNW
Topographic ridge in central basin
High amplitude seafloor reflector
M0087A/ M0087B
M0087C/ M0087D (projected)
Acoustically transparent layer
Basal high
Onlap of basin fill onto basal layers
Acoustically laminated package
High amplitude seafloor reflector
Acoustically transparent layer
Acoustically laminated package
~30 m
1000 m
Layers with lower amplitudes that may be acoustically transparent
Apparent onlap of laminated package onto acoustic basement high
Sharp contact between laminated package and acoustic basement, possibly fault-controlled
