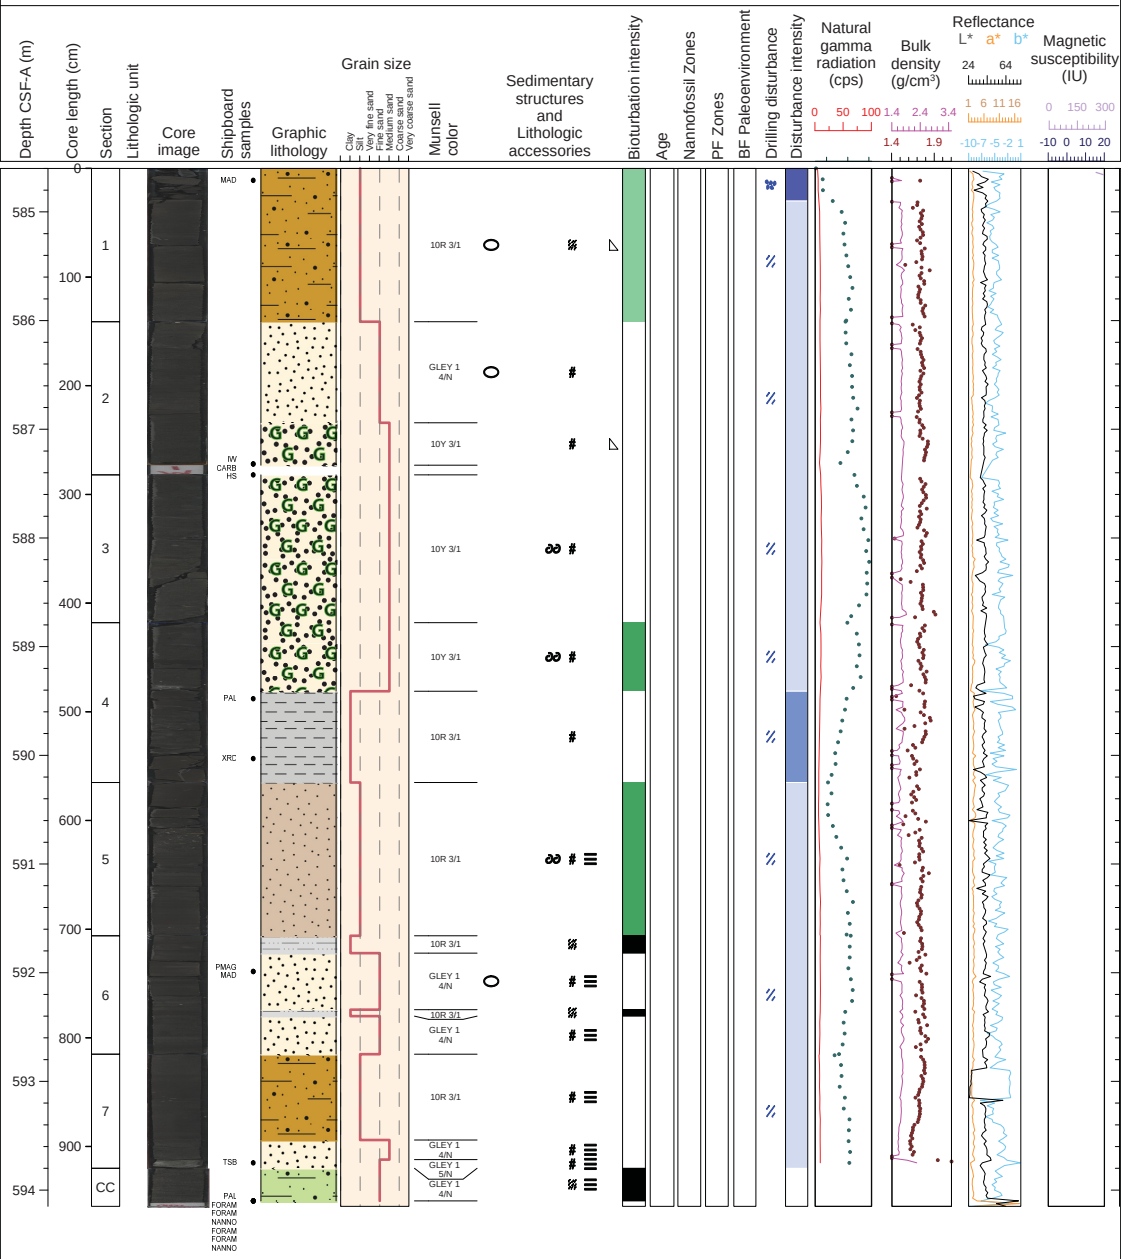
Hole 369-U1513D Core 55R, Interval 584.6-594.15 m (CSF-A)


Core 55R is dominated by very dark gray sandstones and siltystones. Calcite cemented interval is present at an interval of 97-103 cm in Section 3. Pyrites are common throughout. Abundant shell fragments occur in Section 4 (57-59 cm) and Section 5 (38-60 cm). Bioturbation is moderate to intense. The core exhibits slight fractured drilling disturbance.
