

Core

#15:

V_1 : 93-95 cm, 0.1, LG ~~with~~ w/LG halo of ~ 0.2 mm wide, irregular & very diffuse.
 b_1 : melanocratic band of ~ 1 cm thick, from 93-95 cm, diffuse boundaries

#16:

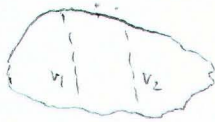

V_1 : 94-103 cm, 0.1 mm, highly recrystallized, green, ~~no~~ very diffuse & irregular (77-90, 0-4)
 V_2 : 94-103 cm, very similar to V_1 , highly recrystallized, green, 0.1 mm, diffuse & irregular. (72-270, 0-9)
 V_3 : 98-102 cm, 0.1 mm, recrystallized. Cuts several feldspar & amphibole crystals.
 irregular & discontinuous & diffuse.
 f_1 : 98-98 cm, 0.1, curved, irregular & splayed. (1-90, 4-0)
 f_2 : 103-103 cm, 0.1, curved, irregular & splayed.
 * V_1 merges with V_2 .

#17:

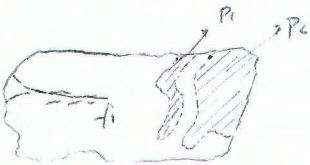

V_1 : 105-106 cm, diffuse & irregular, 0.1 mm, no halo, white.

#18:

V_1 : 108.5-110 cm, very diffuse, probably recrystallized, green.
 V_2 : same as V_1 , 108.5-110, diffuse, green.

#19:

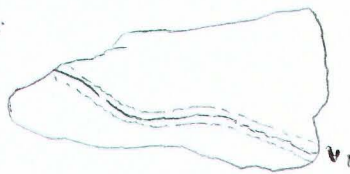

f_1 : 112-112 cm, splayed & irregular, 0.1 mm.
 p_1 : 111-113 cm, melanocratic patch, elongated ~ 1 cm x 0.3 cm, diffuse boundaries.
 p_2 : 111-113 cm, melanocratic patch w/diffuse boundaries.
 Similar to p_1 , ~ 0.7 cm x 0.5 cm.

#20:

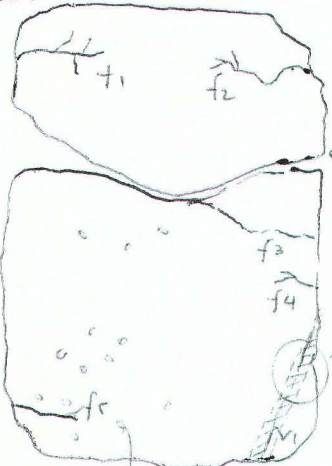

V_1 : 114-116 cm, diffuse, green, 0.1, w/diffuse LG halo of ~ 1.5 mm.

#21:

V_1 : 118-119 cm, diffuse & slightly discontinuous. ~~no~~ LG, w/LG halo of ~ 0.5 mm. Curved.
 possible recrystallized.

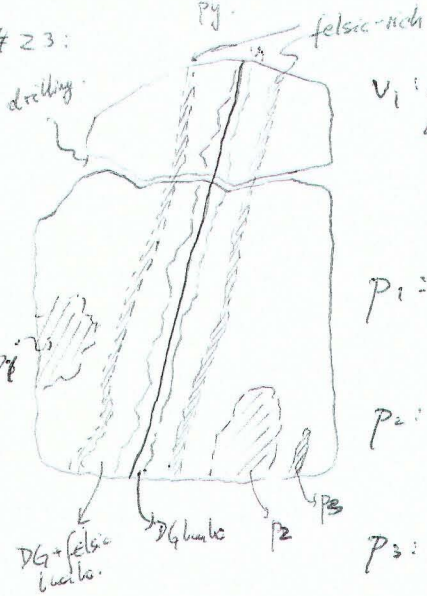

#22:

drilling induced.

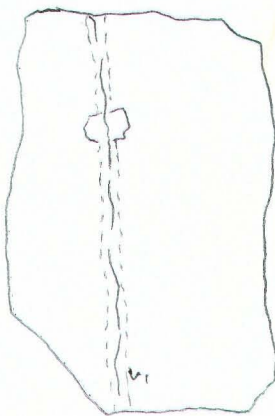

f_1 : 121-121 cm, 0.1, splayed & irregular & diffuse. (0-90, 0-180)
 f_2 : 121-121 cm, 0.1, splayed & irregular. (7-270, 15-180)
 f_3 : 123-124 cm, 0.1, curved & irregular. (2-90, 25-180)
 f_4 : 124-124 cm, 0.1, splayed & irregular.
 f_5 : 127.5-127.5, 0.1, splayed & irregular. (17-270, 3-80)
 V_1 : 125-129 cm, 0.2 mm wide, LG w/LG halo of ~ 1 mm
 It presents elongated felsic crystal, probably indicating a sinistral shear sense. (75-90, 0-178)

#23:

V_1 : 129-137 cm, 0.8 mm, white + LG with complex halo of:
 ① DG, ② DG + felsic, ③ felsic halo w/feldspar phenocrysts.
 74-90, 0-69
 p_1 : melanocratic patch of amorphous shape (almost rounded) of ~ 1 cm ϕ . between 134-135 cm.
 p_2 : small melanocratic patch, slightly elongated of $\sim 2 \times 1$ cm. between 136-137 cm.
 p_3 : small melanocratic patch, similar to p_2 of ~ 0.2 cm x 1 cm. between 136-137 cm.

#24:

V_1 : 138-145 cm, green w/green halo of ~ 1 mm, veins ~ 0.2 mm wide. It cuts several phenocrysts but w/no displacement.
 (77-270, 0-48)
