

Figure F24. Core recovery, epochs, calcareous nannofossil (NN) zones, and New Zealand (NZ) stage correlation for planktonic foraminifers (PF) and bolboformids (BF) and benthic foraminifers (BF), Site U1352. Solid wavy lines = hiatuses between zonal boundaries, dashed wavy lines = hiatuses within biozones, dashed straight line = poorly constrained zonal boundary. See Figure F6 in the “Methods” chapter for NZ stage abbreviations. A. 0–1050 m CSF-A. (Continued on next page.)
