

Transect HYD-01C, Figure F92. Composite showing all through-pipe logging data, conductivity and sonic logging data, and open-hole gamma and EM51 logging data collected in Hole M0036A. TGR = total gamma ray (raw), TP = through pipe. ILD = deep conductivity, ILM = medium conductivity, RX1 = sonic waveforms for receiver 1, RX2 = sonic waveforms for receiver 2. OH = open hole, DL = downlog, MSUS = magnetic susceptibility, IL = induction log.
