

Transect HYD-02A, Figure F44. Composite showing all through-pipe logging data, conductivity and acoustic image logging data, open hole gamma logging data, EM51 and sonic logging data, and optical image and borehole diameter logging data collected in Hole M0042A. TGR = total gamma ray (raw), TP = through-pipe. ILD = deep conductivity, ILM = medium conductivity. OH = open hole. IL = induction log, MSUS = magnetic susceptibility, RX1 = sonic waveforms for receiver 1, RX2 = sonic waveforms for receiver 2, V_p = P-wave velocity.
