

Figure F1. A–C. Bathymetry, Expedition 340 sites (adapted from Hornbach et al., 2015; Le Friant et al., 2015).

Figure F2. Approximate locations and ages of landslide deposits, core recovery, and selected samples, Sites U1393–U1395 and U1397–U1399. Samples A and B denote Site U1397 permeability values obtained from Hornbach et al. (2015).

Figure F3. Approximate locations of selected core samples, Sites U1393–U1395, U1398, and U1399 (modified from Friant et al., 2015). TWT = two-way traveltime.

Figure F4. Schematic of falling head permeameter used for this experiment.
