[cm]	Graphic Lith. Bioturb.	Structure   Fossils	Sorting w m vp bl r	Round-ness a	Color	Accessories	Core Disturbance	Description
0								Gray (silty) laminated silty clay w/ v.f. sand laminae
10								0-18 cm: heavily disturbed
20								18-125 cm: parallel, planar laminated; two sets of fining up packages at 24-64 and 64-125 cm with <del>both</del> sand laminae thickness and decreasing and spacing increasing up section.
30								64-70 cm: massive silty clay
40								Shell fragment at 71 cm
50								Some deformation of laminae at 91-94 and 3-8 cm, where the sediment is more sandy, and could be core disturbance or changes in inclination of the laminae
60								Laminae de change, orientation to inclined at 18-34 cm and 70-87 cm
70								MBIO: 125-150 cm
