[cm]	Graphic Lith.	Bioturb.	Structure	Fossils	Sorting	Round-ness	Color	Accessories	Core Disturbance	Description
					w m vp bl r	a				
0										0-11 cm: lightly disturbed
10										Greenish black
20										(10 Y 2.5/1) laminated silty clay; alternations of black and greenish gray laminae with black laminae becoming more diffuse and more widely spaced down the section
30										laminae becoming more diffuse and more widely spaced down the section
40										laminae becoming more diffuse and more widely spaced down the section
50										laminae becoming more diffuse and more widely spaced down the section
60										laminae becoming more diffuse and more widely spaced down the section
70										laminae becoming more diffuse and more widely spaced down the section
80										laminae becoming more diffuse and more widely spaced down the section
90										laminae becoming more diffuse and more widely spaced down the section
100										laminae becoming more diffuse and more widely spaced down the section
110										laminae becoming more diffuse and more widely spaced down the section
120										laminae becoming more diffuse and more widely spaced down the section
130										laminae becoming more diffuse and more widely spaced down the section
140										laminae becoming more diffuse and more widely spaced down the section
150	laminae becoming more diffuse and more widely spaced down the section									
160										129-150 cm: highly disturbed wet, with gas expansion voids Very dark greenish gray (10 Y 4/1) silt, massive
