[cm]	Graphic Lith.	Bioturb.	Structure	Fossils	Sorting Roundness										Color	Accessories	Core Disturbance	Description																																									
					w	m	vp	bl	r	a																																																	
0																		0-16 cm: highly disturbed																																									
10																					16-150 cm: Dark gray (5Y 4/1) laminated clay; numerous sub-mm silt laminae in packages, but irregularly spaced; clay is also laminated by color on a macro scale; more massive or weakly laminated beds at 30-40 cm and 139-150 cm																																						
20																								- most some silt laminae are positioned at the transition of sharp boundary of dark "winter" laminae and light "summer" laminae and may be the basal part of the "summer" lamina in the couplet of the core, forming a fining upward couplet with a silt lamina at its base
