

Sedimentary structures							
Bioturbation intensity		Grading		Lith. accessories			
Slight		Reversely graded		Ash pods			
Moderate		Normally graded		Pumice			
Strong		Nongraded					
Structures & features				Boundaries			
Planar lamination		Cross lamination		Intraclast		Scoured contact	
Wavy/convolute bedding		Zoophycos		Cross bedded		Wavy contact	
Flame structure		Dewatering structure		Clastic dike		Sharp contact	
Lenticular bedded						Bioturbated contact	
						Gradational contact	
Diagenetic constituent		Bedding, fault, veins		Macrofossils			
Chert nodule		Bedding		Multiple veins			
Concretion		Fault		Banded vein			
Zeolites		Vein		En echelon vein			
		Haloed vein					
Drilling disturbances							
Biscuit		Fragmented		Fractured		Soupy	
Brecciated		Fall-in		Core extension		Up-arching	
						Void	
Shipboard sampling							
SED	Smear slide	MBIO	Microbiology	IW	Interstitial water	TS	Thin section
CARB	Carbonate	ICP	Inductively coupled plasma	PP	Physical properties	HS	Headspace
