

Structure	Fossil		Diagenetic structure
Chickenwire structure	Barnacle	Gastropod	Anhydrite nodule
Cross-bedded	Bivalve	Halimeda	Chert nodule
Fault	Brachiopod	Pteropod	Concretion
Flaser bedding	Bryozoa	Rhodolith	Dissolution cavities
Grading (normal)	Coral (branching)	Scaphopod	Dissolution seam
Grading (reverse)	Coral (massive)	Sea urchin	Filled cavities
Intraclasts	Coral (solitary)	Serpulid	Fully cemented fracture
Lenticular bedding	Coralline algae	Skeletal fragments	Glauconite nodules
Load cast	Echinoderm	Sponge	Gypsum nodule
Low-angle cross-stratification	Foraminifer	Sponge spicules	Manganese crust
Microbialite	Foraminifer (planktonic)	Terrestrial plant fragments	Partly cemented fracture
Parallel lamination	Foraminifer (large benthic)	Trace fossil	Phosphatic nodule
Slump fold	Foraminifer (small benthic)	Tube	Pyrite (disseminated)
Solution cavity/surface			Pyrite nodule
Wavy lamination			
Wavy strata			

Core disturbance	Boundary contact	Facies
Biscuit	Bioturbated	Pelagic
Brecciated	Erosive	Hemipelagic
Fall-in	Gradational	Neritic
Flow-in	Hardground	Littoral
Fractured	Scoured	
Fragmented	Sharp	
Mixed	Wavy	
Soupy		
Void
