This map shows the site locations for IODP Expedition 356, focusing on Western Australia and surrounding regions. The map highlights various geological features and sites of interest, such as the Browse Basin, Rowley Shoals, and the Gascoyne Subbasin. The map also indicates the presence of drowned reefs and Miocene reefs and carbonate build-ups. Notable sites include the Mermaid Reef, Clerke Reef, and Imperiuse Reef. The map includes bathymetric data and is labeled with key geographic locations and scientific sites.
