

69A 6R

Unit
Lithology
Minerals
Veins
Structure
Deformations
Notes

Intensely
Klued
Carbonate
epidote?
This are
form
complex
patterns,
with relay
or steps

Molybdenum
peridotite? dolerite?

cm - irregular
zones of
brownish
alteration
Also green
zones

Intense vein network: mm - 3mm veins.

white
talc
CO₃?
- mixed
white-pink
Green.
Planar
veins
but also
irregular
patches

2mm
pale
green

rubble

26

patches of oxidized
zones + white patches
(see quartz?)
quartz veins?

thin
section
from
n70cm

some fractures
at the bottom part

same rock type as
GR1
broken up pieces
