

75B 1R

10 CM = 4 CM

UNIT

1  
calc  
mud /  
sand  
(part  
lith?)

2  
gabbro

LITHOLOGY

VEINS

STRUCTURE  
DEFORMATION

No structure visible - bubble & sediment

PRIMARY  
MINERAL

SECONDARY  
MINERALOGY

CARBONATE

White carbonate  
fragments

NOTES

Dark spots within carbonate (oxide/serp fragments).  
Unconsolidated with 5cm x 1cm gabbro clast.

• various sized gabbroic  
clasts (~7cm, i.e. two  
largest ones) + carbonate clasts

• primary phases not visible  
• dark green (chlorite) hue

Carbonate matrix with dark spots as above.
