

CT Facies

Unit 1 - alternating light + dark - unclear from lithofacies - what controls it
light w/ mod. density + high at.#
dark w/ low density + low atomic #

Unit 2 - mostly light with 3 darker bands in more murky parts.
light w/ moderate density + high at.#
dark w/ mod. density + low at.#

Unit 3 - 2 patterns Top - bright w/ mod. density + high atomic #
bottom w/ low density + high atomic #

Unit 4 - mostly light with low-mod density + high atomic #
with patch in upper fold w/ dark w/ mod to high density
and low atomic #
