10											
16			16	claystone							
21			21								large burrows
30											<u>general description</u>
40											bioturbated wackestone
45											with alternation
50											to marlstone
55				25 50							gray claystone layers intercalated
60											at 16-21
65											96-100
70											103-104
75											113-115
80											color: 2.5T 7/2 (light gray)
85										for wackestone part	
90										2.5T 6/2 (light brownish gray) for marlstone	
95										CT facies	
100										light gray dominated	
105										clay layer at 96-100 cm	
110										is black (low atomic number low density)	
113			96								
115			100								
118			103 104								
120
