Granite

128 cm - s, 10/40, 25/30 - (3)

16-29 cm - shear fracture, calcite fill up to 5 mm thickness

40-139 cm - sub-vertical shear fractures, black fill sub-mm and white filled tension gashes between 45° and 60° to the black fractures. Tension gashes up to 1 cm wide with external calcite

Coarse-grained granite, K-feld (3 cm), plagioclase (2 cm), quartz (2 cm), and biotite (<0.5 cm). Locally greenish.
