

Lithology		Shipboard samples	
	Silty claystone	CARB	Inorganic carbon
	Siltstone	GWIC	Ship GWL without acid
	Breccia	GWICP	Ship GWL with acid
	Mass transport deposit (MTD)	HS	Headspace gas analysis
	Volcanic fine ash	HSECD	PFC contamination check
	Void	HSECDM	PFC contamination check/ Mud
	Extracted core (sample)	IMP	Resistivity
		IW	Interstitial water
		IWP	Interstitial water/Plastic
		IWS	Sediment cake squeezed to obtain interstitial water
		LMT	Liquid mud water tank
		IWT	IW/Trimming small
		LCL	Liquid from core liner
		MBIO	Microbiology whole round
		PALW	Paleontology from WH
		PMAG	Paleomagnetism
		PP	Moisture and density
		PWVD	P-wave velocity
		SS	Smear slide
		XRD	X-ray diffraction
		XRF	X-ray fluorescence
		VCD	Visual core description
Deformation structure		Sedimentary structure	
	Fault	@	Chaotic bedding
	Fault breccia	▬	Graded bed
	Reverse fault	≡	Inversely graded bed
	Shear	≡	Planar bedding (lamination)
	Vein		Tube structure
Drilling disturbance		Bioturbation	
	Moderately fractured	§§	Moderate bioturbation
	Highly fractured		
	Soupy
