

Units IC-IA

Deep-marine sedimentation with little, varying terrestrial input
More oxidized + increasing content siliceous microfossil: cooling climate?

Units IF-ID

Deep-marine sedimentation with little terrestrial input in varying amounts

Units IIB-IIA

Continental shelf
Deeper marine + small turbidites
Deepening or less terrestrial input

Units IIF-IIC

Continental shelf
Start of rifting
Coastal to lacustrine

~~~~~ Unknown hiatus

### Unit III

Continental terrestrial to littoral deposition  
Prerift sediment
